

JHON RAVEN P. CADIZ

Manila, Philippines | +639935298842 | jhonravencadiz02@gmail.com | Front End Developer
<https://jhonraven.vercel.app/>

Professional Summary

Frontend Developer with full-stack experience building and maintaining a production real-estate platform at GRID Venture Property. Skilled in React, Next.js, and TypeScript on the front end and Node.js, Express, and MongoDB on the back end, with a focus on performance, clean UI, and shipping features end to end. Increasingly uses AI-assisted and agentic coding workflows to build and deliver faster. Background in QA testing and React Native mobile development.

Technical Skills

Frontend Development: React 19, Next.js, React Native, TypeScript, JavaScript (ES6+), Vite, TanStack React Query, Tailwind CSS, HTML, CSS

Backend Development: Node.js, Express, MongoDB / Mongoose, REST APIs, JWT & Google OAuth, Zod, Supabase

AI & Agentic Development: Agentic Coding, AI-Assisted Development (Claude Code), Agentic Workflows, Prompt Engineering, AI Developer Tooling

QA & Testing: Manual Testing, Bug Identification & Reporting, Test Case Writing & Execution, UAT, Regression Testing, System Troubleshooting

Tools & Platforms: GitHub, Git, Figma, Vercel, Firebase, Expo, Postman, Google Sheets/Docs, Excel

Work Experience

QA Intern — GRID Venture Property | Feb 2026 – April 2026

- Wrote, executed, and maintained manual test cases using Google Sheets/Docs.
- Identified, documented, and tracked bugs and system errors.
- Coordinated and participated in UAT and Beta Testing sessions.
- Collaborated directly with developers to verify bug fixes.

Frontend Intern — GRID Venture Property | Feb 2026 – April 2026

- Built the GRID Mobile App using React Native.
- Collaborated with cross-functional teams on UI/UX.
- Adapted web workflows into mobile-friendly interfaces.

Frontend Developer — GRID Venture Property | June 2026 – Present

- Develop and maintain the GRID web platform — the customer-facing app and the internal admin console — using React, TypeScript, and Next.js.
 - Turn Figma designs into responsive, reusable UI and ship features from design to production.
 - Work across the full stack, building and integrating backend APIs with Node.js, Express, and MongoDB.
 - Optimize front-end performance and page load speed, and fix bugs across the app.
 - Use AI-assisted and agentic coding workflows in daily development to build and ship faster.
 - Collaborate with the team and help manage releases from staging to production.
-

Projects

GRID Mobile App (Internship Project – Finished)

- Co-developed a production-grade mobile application using React Native based on an existing web platform, collaborating equally with team members.
- Contributed to feature scoping, component development, and mobile-friendly interface adaptation across multiple screens.
- Improved app usability and performance through iterative testing and close collaboration with the development and design teams.

StudyFlow App (Personal Project – In Development)

- Independently designed and developed a full-featured task and study management mobile app with a Pomodoro/focus session timer.
 - Solely responsible for UI/UX design (Figma), frontend architecture, and all core feature implementation from concept to completion.
 - Demonstrates ability to own and deliver a complete product end-to-end as a solo developer.
-

Education

Bachelor of Science in Computer Science

STI College – Pasay EDSA | 2022 – Present

Key Competencies

Full-Stack Development • React & Next.js • Node.js & MongoDB • AI-Assisted Development • Web Performance • Manual Testing • UAT • React Native • Git Version Control • Agile Collaboration • Figma
